Tuesday, September 25, 2018

Client and Family Centered Care is a key value for Holland Bloorview Kids Rehabilitation Hospital. Some of our families are here for several weeks to months at a time, even over the winter holiday season. Thanks to groups like the North York Concert Orchestra, our families and patients get a reprieve from therapies, medical appointments and the stress of being in a hospital setting to experience the joy of music. The NYCO Chamber Players have performed annually for us for years. Our atrium gets transformed into a gorgeous concert hall as the sound of music fills the hospital!

Patients, families and visitors love the annual NYCO performances as they are top quality, professional and very generous performers! The hospital staff look forward to their return each year, often I receive emails and am stopped in the halls to find out when NYCO is coming back. The orchestra members take pride in all aspects of their performance and go out of their way to engage the viewing audience, providing insight and hands on opportunity to experience the wide variety of instruments. It is rewarding to witness the pleasure and joy as band members interact with the patients, spreading the gift of music.

We very much look forward to our annual performance and recommend the North York Concert Orchestra to any group looking to experience a wonderful evening of enchanting music!

Sincerely,

*Robyn Sanford*
